We believe what we feel.

Nowadays we're in the age of digital information overload.

An age with so many things on screens with overflowing,

changing and constant information,

making us unsure about what is true, and what is hype.

We believe that what people need in this age is the "actual experience".

We want to be a part of the moments when people are so engrossed

in enjoying themselves in nature that time is forgotten.

At Jackson we strive to offer the "actual experience" beyond digital.

JESTER

Enjoyable experience for sea bass fishing

This rod has been designed in collaboration with an experienced captain of a popular sea bass boat at Tokyo bay.

Based on the tour guides experience we pursued the rod which anglers need now.

Our conclusion was the "Ability to accommodate", and a build a rod which can adopt to varying circumstances where there is constant change and anglers can then still fish with enjoyment and ease.

So the "JESTER" was born.

Improving on the basic performance features, it has flexibility which anglers can feel and enjoy through the chrome blank which can adopt many situations, showing versatility at all times.

Fitted with TORZITE rings by Fuji for ultimate performance and blank suitability.

Without compromise, we proudly introduce JESTER.

Grip design has both design and functionality.

Made from original material to provide power and increase hook up rates.

Titanium torzite ring by Fuji

JSC-66TL-P+

A baitcasting rod designed specially for flipping cast. The blank is Jackson's original development concept called TL action (Technical Light action) designed to fish light weight lures. Its design allows for extremely accurate pin point casting with variety of lure weights include light weight tackle. Its construction and design make it very sensitive but powerful enough to strike and fight sea bass. This rod gives the angler sensitivity, accuracy and power all in the one rod.

JSS-610M-SP

This is an all rounder for sea bass fishing, and one of the greatest features is its rear parts. The suspension system in the rear section enables the angler to react to fish bites immediately. This system also allows anglers to enjoy the fishing with larger lunker sea bass, blue fish and flat fish. Its smooth sensitive tip allows fish to strike and increase hook up rates. Maximum lure weight is 35g, and can handle wide range of weights and types of lures. Its blank is Jackson's original design, which is a combination of a powerful action and elastic function. This rod allows anglers to cast both with pin point accuracy and with distance when needed.

High cost performance ever

Developed and designed for surf fishing. It is suitable for flat fish, lunker sea bass, yellow tail and large mackerel. Jackson's original blank design with Fuji K guides, allows anglers ultimate casting distance with PE line without interruption.

JOG-1062M-K SF

The length 10.6ft is perfect for surf fishing, and suitable for heavy plugs or metal jig lures and longer minnows.

JOG-1112MH-K SF

Capable of long distance casting when wading from the shore. Suitable for species like large blue fish and is suitable for heavier lures jigs up to a maximum of 60g.

K guide frames by Fuji are equipped. The use of PE line is safer due to alconite adopted for the ring.

Improved with newest technology

Ocean gate has an improved designed and specifically for horse mackerel. It has new intergrated technology and now capable of more aggressive fishing styles. The blank has also been modified for improved power and balance giving a mix of power and sensitivity when required.

JOG-600XL-K ST AJ SOLID TIP MODEL

This rod has a unique design specifically for inshore jig head fishing. Its sensitive tip is perfect for sensitive hook ups and strikes while still maintaining power and balance for fish like Horse Mackerel.

JOG-604UL-K ST AJ SOLID TIP MODEL

A standard model which is well balanced as for sensibility, operability and casting distance. A perfect rod for for single jig head fishing, but also can be used for micro plugs with its quick action.

JOG-610L-K ST AJ SOLID TIP MODEL

A versatile model which can handle jig heads, carolina rig and micro jig. Its length of 10ft is suitable not only for a varieties of rigs but also for different kinds of situations such as seawall or seashore. Therefore it deserves to be called the all-rounder.

Reborned for rockfish anglers

Ocean Gate rock fish series are a design innovation for rockfish fishing. Constant field tests have helped design the action which anglers need to fish successfully. Dividing the series for horse mackerel and rockfish, the models anglers demand are successfully lined up and ready to use.

JOG-72UL-K ST MB SOLID TIP MODEL

This model has high hooking rate due to its sensitive performance and balance. The angler can feel the subtle difference of tidal currents and strikes through the rod tip, allowing anglers to detect the slightest of strike or movement.

JOG-76L-K ST MB SOLID TIP MODEL

With a length of 7.6ft its perfect for fishing sea walls from the shore. It has a sensitive solid tip which can handle wide range of lure weights, making it a versatile choice.

JOG-76L-K MB

Built with a hollow structure with great versatility, it can be use with a single jig head, plug, micro jig, and heavier lures for floating rigs. Its powerful and balance give versatility and give the angler options for different situations and is capable of large rock fish.

K guide frames are equipped

OCEAN GATE

Shore Jig

For everyone enjoys the intense and dynamic shore jigging. Blueback fishes can be said the main target in salt water fishing now. Everyone are excited and addicted the strong tug and the boil like the sea is boiling. It is the orthodox rod that everyone can enjoy the easily such a dynamic fishing. 24t carbon is excellent in persistence compared to 30t and 40t, and its moderate tension enable everyone to cast easily, ideal material for a jig rod. This is wound up using the original taper design that Jackson has developed, and is finished as a high balance design with strong and reducing heavy holding feeling.

K guide frames by Fuji are equipped. The use of PE line is safer due to alconite adpoted for the ring.

JOG-906ML-K SJ

A model best suited as an entry model of shore jigging. The length of the rod makes it easy to handle, and it is ideal for jig casting from a levee. It is recommended for anglers who develop game around 30 g of metal jig.

JOG-908M-K SJ

At an exquisite length of 9.8 ft, it is easy to operate while securing long range performance and cast covers from levee to surf. It corresponds to major weights in shore jigging for a metal jig. It is 20 to 60 g and it is a standard model for medium size blue runners.

JOG-1000MH-K SJ

A suitable rod for fishing in vast fields such as surf fishing. A long rod which corresponds to the cast of a large plug such as a diving pencil, as well as to cast a jig of 20 to 80 g at great distances. It is also suitable for fields where large blue runners can be found.

JOG-1006H-K SJ

A heavy power model that corresponds to circumstances where you can not compete with a light jig like strong wind surf, quick tide at rocky shores and deep shores. It handles jigs up to 100g, and has the power to challenge monster hunts aiming at bonito, large dorado, etc. This is the one which can be a subordinate rod for skilled anglers.

SAGOSHI

Developed with a desire to supply a special rod suitable for Sagoshi for beginners after understanding the predation characteristics of Sagoshi. Its predation method is different from sea bass and blue runner, it is not a predation which inhales bait, it likes to bite its prey first, the sharp teeth bruise baitfish, then they chase the weakened ones. This is why the rod must have a sensitive tip section to feel these bites as they are not as strong as seabass and others.

JAM OVER

TORZITE

The lightest model with thin rings and titanium frames. Downsizing became possible by expanding apertures, and it also became possible to use smaller guides.

Specification

JAM-555XXXL-AS

The Jam Over super technical 30t for full-solid blank specification, extra tuned model born to capture small aji, a severe game found in harbor areas, which require a more technical method. The JAM-555XXXL-AS is a 5 ft 5.5 inch, short length rod that achieves a high balance of miracle that does not feel the weight of all solid blank at all. Together with its short length, you get amazing operability and a hooking response. The short length contributes also to sensitivity improvement, not only to surely capture the bite of the slight feeling level which is difficult to perceive, as well as the water pressure change due to a slight tidal current and the water depth are also transmitted to the angler, a light weight easy to feel no It makes jig single game clearer. In addition, the tip which was scraped to its limit demonstrates the unique feeling "can be hung, but it can be hung" without playing the fine bite of bean trevally.

ALL CARBON SOLID

JAM-602XL-ST

THE ACTIVE SETTER In contrast to JAM-600XXXL-AS, the tip model specialized in "Fishing of hooking" using the lightweight jig head less than 1.8g. The metallic tension and outstanding high balance transcend the sensitivity and operability of usual Ajing rod, and transmit a delicate bite to the angler like a sensor, enable the active style that going to hook aggressively. It is the speciality model of the lightweight jig head has the applicability can use in in any place such as a small point of a harbor of cause, at a breakwater and a rocky beach.

SOLID TIP MODEL

JAM-600XXXL-AS

THE JAMOVER The extra finesse model of all-solid blank specification symbolizes the series concept of JAM OVER. By using a higher elasticity 30t carbon than other normal solid rod for the blank material, it became the stickiness and flexibility of the all-solid's feature, so it combined the sharpness with the outstanding sensitivity that overturn the concept of a usual all-solid. The blank bends like a whip and puts even the slight weight on the rod surely, achieves incredible flying distance that you can't think it is 6ft by even the ultra-light jig head of 0.4g class. The tip that pursuit the delicacy as much as possible, catches even the delicate tidal sensitively and the presence of the rig which doesn't have much resistance, shows the hooking ability like it's a automatic without flicking the delicate bite of a small horse mackerel and reluctant eating. In addition, suspension performance of the unique all-solid. In addition, the unique suspension performance of all-solid prevents the ultra-fine mono filament line with small elongation from break, enables to bring the unexpected big fish to landing. The ultimate one only can be produced by Jackson that knows all-solid well.

ALL CARBON SOLID

JAM-610XL-ST

THE WIDE ACCURACY The blank equipped with the delicate and sharp solid tip with the strong power and bit longer length, it is the all-round model that doesn't choose any sizes, fields and the lures of mackerel you're aiming. Its ability can manage from the delicate fishing of the lightweight jig head to the reaction that is required the quick operation perfectly, and corresponds to a small plug and Carolina rigs. The exquisite taper design that bends smoothly according to the load while it has the metallic tension, has the power doesn't give the initiative to a big mackerel and also the flexibility to avoid a sudden rush. In addition, it is the rod that you often choose when you are in trouble to choose a rod cause of its high versatility.

SOLID TIP MODEL

Surf Tribe

— halibut model —

Specification

STHS-1062M The all-rounder
Models that correspond to fishing with high gravity lures such as heavyweight plugs and metal jigs that became standard at the moment. At 10.6 ft length, which is the standard length for surf fishing, it is possible to fish with good handling that is not too long and not too short. A well-balanced taper design and 40t material blanks are superior in weight reduction and long casting performance, and the butt power corresponding to huge flounder treats all fish in the surf as sea bass and blue runners. Heavyweight plugs and metal vibrations, worming with a jig head under severe circumstances, 12 to 14 cm minnows, and a metal jig up to 45 g, correspond widely to the lure required for surf fishing. It is an all-rounder that covers all of surf fishing.

Double nut system which has endurance for line tangle.(1062M, 1112MH)

STHS-1112MH Long dynamo
Models that correspond to situations such as high-waves, widely shallow fields, and strong winds and other circumstances where you need to cast a far distance. It has high elasticity and it is made from powerful material with 40t as the main material applied for a long length of 11.1 feet. A cast from the long rod delivers a lure to the mouth of a fish a distance from the shore and it is able to pass beyond surging waves. Applicable power corresponding to 30 to 40 g of heavy weight plugs, metal vibrations, long minnow for casting away, sometimes up to 60g of metal jig is not limited to flat fish of far superficial surf, but also sea bass before overwintering and large blue runners such as Spanish mackerel are targeted. The balanced design never takes away from the angler's ability to concentrate with sensitivity to forget the length of 11 ft. This is the one to conquer surf fishing.

STHS-9102L For the finesse
A finesse model for surf fishing corresponding to fish that do not use their mouths, such as fish that have been injured due to environmental changes such as stormy weather and a sudden drop in water temperature, and fields that have been highly pressured by anglers. In surf, worming using super lightweight 5 to 14 g of jig head is made possible. In order to cast a lightweight lure for long distances, it is necessary to turn the blank firmly into a repulsive force when casting even with its own light weight. If it is too hard or too soft, it becomes a negative factor for casting distance. Material with moderate stickiness and repulsion is applied to the model. It changes its repulsion force even if it is lightweight itself and it can cast far. This material, plus its casting distance guarantee that you will not miss a bite. The solid tip seems to be delicate at the first glance, but it is great with respect to sucking bites. For flatfish with bite, it becomes negative to use a solid tip. It needs a sticky tubular tip in order to hook around the hard jawbone while leaving a lure in the biting mouth. The belly of the damper role that protects the thin PE line continues to give pressure to the target, while absorbing shocks. It goes without saying that the butt has enough power to respond to flounder. The tubular tip is not only capable of worming but is also excellent in operability with iron vibrations and metal jigs up to 20 g and it has a flounder aim when chasing small baits. Surf FINNESSE fishing corresponding to micro jigging for blue runners to the extreme model.

Adopted finesse grip for 9102L model.

MODEL	Length (ft / cm)	Power	Rigweight	Line	Action	Self Weight	Collapsed Size	Piece	Tip Diameter	Carbon Fiber	Other Materials	Price

HIDEOUT HUNTER

Specification

HHS-710MH-MST SOLID TIP MODEL
HHS-710MH is the ultimate versatile rod for a wide range of fishing applications, tight bottom fishing, and middle water column fishing methods. Many anglers believe that 'Versatile' is a 'broad adaptation', meaning a 'lack of expertise' and 'no features'. However, the "ultimate versatility" in HHS-710MH means that each of the crucial properties of "distance," "sensitivity," "operability," "stickiness" and "power" required for targeting rockfish, and are all incorporated into one rod. We have managed to combine multiple characteristics into the rod so that one does not change the performance of the other and each feature of the rod is strong and effective. It is possible to feel the bottom using a lighter rig even in deeper water situations, but still allows the angler to achieve great casting accuracy and to target fish among structure. Using the swimming fishing method the blank will automatically respond to any unexpected bites that push up from the bottom, it absorbs impacts, holding fish connected, reduce line breakage up and improve hook up rate. When heavy load is applied to the blank after hooking, "stickiness" is instant in the metallic tension rod, the bend point is variable depending on the strength of the load. While absorbing the fight back into structure with its high suspension capability, it has the power which handle even fish 3kg and over. this rod has every aspect of Rockfish fishing covered.

HHS-810XH
Spinning model specialized for a wide range of applications. A long, high-responsive blank of 8.1 ft is excellent for long range casting, and it is also suitable for fishing tight to the bootom. Using high sensitivity materials in this long rod has excellency in operability and corresponding to various rigs, keeping the power to stop the the target species returning back to the structure, while maintaining sensitivity. This rods allows the angler to reach fish in the monster class they have never been able to target before.

HHC-706H-MHT
HHC-760H is a power game rod which combines both "rigid" and "soft" features to help the angler fish steep underwater terrain with accuracy. The rod is designed for extracting tough fish from heavy cover and structure, and has the power to do so, but with its combination of features within its design, the power is still there for larger tough fish but the sensitivity and finesse remains so the angler can still read the bottom, cast with accuracy and a length of 7' 6" makes this rod beautiful to use. The rod has been developed for Rockfish specifically and to target where they live and enable the angler to fish in tight structure and to be able to get his lure exactly where it needs to be, but at the same time have the power through the butt section to extract the fish. Therefore, what is important is the "sticky power blanks" that enables both delicate and bold styles of fishing, which is also the biggest feature of HHC-706H, its casts with accuracy but still has a delicate tip that is not common on a power rod, giving the angler finesse and power in the one rod.

Original bag is attached. Compact size and suitable for the opportunities when you prefer having less baggage.

Fuji titanium frames SiC-S

HIDEOUT HUNTER

VG Vortex Generator

Patent Pending

Revolution of Casting Distance

The Vortex Generator is usually applied to vehicles or airplanes, it is used for reducing air resistance and improving aerodynamics and we have applied it on the lip of a minnow to improve the casting distance.

The changes are minimal, but the advantages are great.

Casting distance was increased at an average of 10.3% with 17mm minnow.

collaborated with: 風と流れのプラットフォーム

When a minnow with a lip is retrieved the water pressure around the lip generates a vortex called the Karman vortex on the back side of the lip. This vortex whirls right and left, which helps the lure to move and swim, but the same happens when the lure is in the air and the Karman vortex is generated swallowing the lip since the lure is usually cast backwards. In the same way as underwater the lure shakes right and left in the air also, which is one of the biggest reason the lure breaks its posture and loses distance during the cast.

When the lure shakes in the air, it increases air resistance and decrease the flying speed, distance and accuracy.

Therefore we decided to try to apply vortex generator on the lure's lip to reduce the negative factors caused by the Karman vortex and stabilize its posture and increase the casting distance.

With vortex generator on its lip it creates a small vortex disturbing the air flow and the Karman vortex occurs outside of the small vortex around the vortex generator of the lip, which means the Karman vortex occurs further behind the lip so that the negative effect is less, and stability in the air is increased. As a result, air resistance is reduced and the best casting distance can be produced using the Vortex Generator system.

We tested the lure with vortex generator and without it, and recognized the reduction of air resistance at 4%. The reduction was noticed especially around the lip and the movement when casting was decreased also.

We tested it with everyday anglers and the experts under many different situations, and found out everyone's casting distance was increased at an average of 10.3%. (Tested with Athlete 17SSV). When the conditions were difficult with a strong head wind, the difference between with and without vortex generator was very effective.

The vortex generator lip will be a major advantage for many anglers.

2019 NEW

Athlete 17SSV/17FSV

Amazing casting distance and posture stability

The Athlete 17SSV and 17FSV with the Vortex Generator enables amazing casting distance. Long minnows require a certain technique to cast well due to their length and not be aerodynamic and many longer minnows are difficult to cast long distance with stability.

One of the biggest reasons for the casting difficulty is the shaking movement of the body through the air which generates extra air resistance, which reduces casting distance.

The Athlete 17SSV and 17FSV have the vortex generator on its lip, which can mitigate air resistance and reduce body shake, giving the Athlete 17SSV and FSV stability in the air and in turn longer casting distances consistently.

The average casting distance has been tested completely and found that a lure with the vortex generator increases casting distance by 10.3%.

The angler feel and experience the difference and its posture stability even against the wind.

It has the sharp darting action that is well known from the Athlete series and also a wobbling and rolling action with slower retrieves, allowing the angler to trigger reaction bites by jerking when required.

2019 NEW Athlete 14SSP

New Athlete for large predators!

The Athlete 12SSP is a sinking pencil designed for surf and flat head fishing, however over time its proved that its very effective for blue fish or sea bream also. Then, the new Athlete 14SSP was born. It is wire through construction and capable to cope with large predators such as big jaw sea bream, big blue fish, huge sea bass and flat fish.

Its balancing weight was moved a little forward to give it a natural fall, which is useful for both surf and shore. The lure during casting holds its stable posture which enables anglers to cast long distances and as much as metal jigs. Its larger size makes the action wider, and moving it in a big arc it creates irregular actions with faster retrieves, driving fish to strike the lure with aggression.

2019 NEW Pin Tail サワラ Tune

Pin Tail Sawara Tune

Designed For Larger Mackerel and pelagics

The Pintail Sagoshi (baby mackerel) was designed and released specially for baby mackerel for the first time in the industry, and became very popular among keen mackerel anglers. On the back of its popularity and the need for a larger model to target larger Mackerel we have designed the Pintail Sawara (Spanish mackerel) which contains all the performance features of the Pintail Sagoshi.

2 sizes are available: 105mm with 35g and 120mm with 42g. Not only increasing its size, but it was designed freshly to specialize the use for spanish mackerel while keeping Sagoshi tune's specific. Pintail Sawara tune can be used in combination with the Sagoshi tune for different purposes and for targeting various sized fish from the school, with Sawara Tune to be used to target larger mackerel.

The angler can now target larger fish with all the amazing features of the Sagoshi Tune.

G-Controlling 180

Designed For Trolling

The Jackson G-Control series is world renowned for its high speed ability and tight fish catching action, so the larger G-Controlling model was natural progression from the current sizes.

The G-Controlling has all the features and attributes of the smaller 28 and 40gram models but has an increased size of 180mm and has been purpose designed for high speed trolling for large pelagic species. The G-Controlling secondary bib adds stability at speed and also when trolled in turbulent waters with a diving depth of between 1 and 2 metres. It's hardware and wire construction have also been purpose designed for larger species and the G-Controlling has proven itself in testing time and time again.

Size	Weight	Type	Hook	Color	Price
180mm	75g	Floating	#2/0	8Color	¥2,700

港の James ジェームズ

The Minato James has been designed to have an action under super slow retrieves while the lure swings in strong currents, the sharper lines of this lures give off a superb flash during these slower retrieve situations.

It falls at a natural pace and the small bib allows the angler to control its depth easily during the swing and enable the angler to let the lure drop into deeper pockets and rise up in shallower areas.

The Minato James can be used year round and versatile enough to fish smaller waters and larger open waters as well.

Daniel

ダニエルヘッドロック

HEAD ROCK

New Daniel series!

This lure has developed based on the idea of "The head for rock fish which anyone can fish easily using feel". Through field work, we have realized the importance of vibration and flashing for rock fish. Daniel head Rock was developed with inspiration from the Jackson Teppan vibe of which ability and response is well known.

Yuki Nagira Salt Water Field Staff

Simple retrieving enables the Daniel head Rock move its head left and right, and creates strong flashing and fluctuation, moving its head gives the soft rubber trailer lure a more lifelike action and urges rock fish to strike. Also its balancing weight is placed backward so anglers can achieve overwhelming cast distance and fast sinking, which can be advantage for wide area fishing allowing the angler to cover so much ground. Daniel head Rock is a fun and easy lure to use for rock fish and many bottom dwelling species.

Weight	Type	Hook	Color	Price
14g/21g/28g				¥950
35g/42g	Jig head	特注	8Color	¥1,000

"original willow shape blade" ruggedness surface gives more reflecting interface and creates stronger flashing.

"original screw lock hook" best shape for rock fishing and screw keeper prevents its moving.

"DF plate (Daniel flashing plate)" creates strong flashing and fluctuation.

"center of gravity placed backward" stabilize its posture and gives longer cast distance and fast falling.

飛び過ぎ Daniel

- Horse mackerel
 - Rock fish
 - Barracuda
 - Sea bass
 - etc
- 1g Size : 21mm / Hook: #12(single) / ¥650
 3g Size : 35mm / Hook: #14 / ¥800
 5g Size : 42mm / Hook: #12 / ¥830

Suitable size for light salt water fishing and suitable for various fish like horse mackerel, barracuda, rock fish and so on.

1g focuses on catching horse mackerel and has single hook with tinsels to make the most fussy of fish bite.

3g and 5g have a treble hook for multiple uses and can target multiple species.

Light lures usually don't have long casting ability, but this lure has made it possible and enables you to fish harbors, river mouths and rocky beaches where the need long casting applies, and helping the angler catch species they have never reached before.

If you let it fall naturally, it sinks fast, this fall speed is one of the attractive points of this lure, and very effective to fish deeper water situations. Not only falling fast but also a rolling action on the fall at the same time, which appeals to horse mackerel, barracuda and rockfish. The Daniel has a great mix of natural falling speed while keeping a rolling action.

飛び過ぎ Daniel

- Migrant fish
 - Sea bass
 - Flounder
 - Hairtail
 - Dorado
 - etc
- 40g Size : 83mm / Hook: #6 / ¥1,250

Perfect size for blue fish and other medium to large sized pelagic species.

There is a small spinning blade set at the tail behind the rear treble hook, its placement is crucial and does not interfere with the hook, but entices the bite and increases hook up rates. Not only does the blade add increased flashing and vibration but adds to the lures wobbling action and can be varied with retrieve speed used for the appropriate species. It can adjust to fast retrieving speed too. The blade can also be used on fast retrieves and can be used as a abuzz bait style.

The body is designed being considerate of the blade and its placement, so the blade will not reduce the long casting ability which characterizes "Tobisugi Daniel" series.

The blade also enhances appeal when falling and an assist hook is placed at the rear of the head, which increases the chances of the hook set.

飛び過ぎ Daniel

- Sea bass
 - Flounder
 - Migrant fish
 - etc
- 14g Size : 61mm / Hook: #12 / ¥950
 20g Size : 67mm / Hook: #10 / ¥1,000

30g Size : 80mm / Hook: #6 / ¥1,100

- Hairtail
- Dorado
- Migrant fish
- Sea bass
- Flounder
- etc

The larger version of the Daniel are suitable for surf, harbor, river and beach and applicable for almost every middle size fish such as Flounder, seabass and flathead, with great casting ability, it reaches wider areas and more fish.

Since it casts further than you imagine, it will open up even more fishing situations for you.

The Daniel will reach areas you have never fished before and for its size has an amazing casting distance ability, even the smallest sizes cast extremely well.

It has strong rolling action and is appealing to multiple fish species and with its distinct action and vibration and irregular sonic set the Daniel above all other metal vibration baits. It falls to the bottom quickly and rolls well when falling and the treble hook on belly allows for maximum hook exposure and increasing hook up rate.

Tappan Blade

鉄PAN Blade

20g Size: 56mm / Hook: #12 / ¥950 28g Size: 56mm / Hook: #12 / ¥1,000

Teppan vibe has achieved countless successes and has reputation as a strong long lasting metal vibe. The Teppan Vibe has been designed then manufactured with strength in mind, and the body and components are built to last and withstand punishment from anglers and fish. The Teppan vibe is fast getting a name for itself as not only a tough lure but a first class fish catcher as well, with the team being able to combine strength and performance into this lure. Applicable for wide range of fish from sea bass, blue fish to rock fish. Teppan Blade was proudly designed for the fearless angler who is not afraid to cast anywhere.

Tappan Vib

鉄PAN Vib

9g Size: 48mm / Hook: #12 / ¥850 14g Size: 55mm / Hook: #12 / ¥870
20g Size: 63mm / Hook: #10 / ¥890 26g Size: 72mm / Hook: #8 / ¥910

Cast ability and response, strong undulation are achieved in high level. Swimming attitude is natural and also when it falls it is stable which cause no line trouble. Even it is equipped relatively bigger size hooks but no stress when you use this lure.

Tappan Long

鉄PAN Long

28g Size: 110mm / Weight: 28g / Hook: F#6 C#6 B#6 / ¥1,000 35g Size: 115mm / Weight: 35g / Hook: F#6 C#6 R#5 / ¥1,100

Popular vibration lure Teppan vibe gets longer and bigger! Its 115mm long body has well balanced weight with long cast ability to search large area.

Spoon Complete改

28g Size: 77mm / Hook: #6 / ¥900 38g Size: 83mm / Hook: #6 / ¥1,000

This spoon has high specific gravity of its lead material body. The body part is manufactured by casting method so heavy weight is highly achieved and long cast ability is equipped at the same time. Fall action is sliding style which appeals long-span to fish.

PLUNGE

55g Size: 95mm / ¥850 70g Size: 103mm / ¥900 85g Size: 110mm / ¥950

At the time of falling, the metal jig that you can adjust either focus on speed, or focus on unappeal the way angler wants. It is PLUNGE. When it falls freely, the falling is slow and fluttering in almost horizontal posture. When you add lightly tension to line, falling posture is nearly vertical and it can accelerate the falling speed. It is the versatile metal jig can use in many ways.

HATA CRAW SEAWO- QUAKE CLAW SALT EDITION

Size: 3.4inch / Quantity: 5 / ¥520

Quake claw salt edition which gets bites and reactions compatible effective not only for rock fish games but also for various games such as flat games from a boat. Regardless of Shore / Offshore, you can use either baitfish pattern or crustacean pattern, and will force fish to bite by a fascinating super high pitch arm action!

GALLOP "Baby"

3g Size:31mm / Hook:F#10 R#14 / ¥500
7g Size:41mm / Hook:F#8 R#10 / ¥500

5g Size:36mm / Hook:F#8 R#12 / ¥500
10g Size:46mm / Hook:F#9 R#8 / ¥550

Down-sized metal jig from the standard shore jig lure "Gallop assist fall edition". This lure covers all light salt game such as rockfish, horse mackerel and so on. Sliding fall action is so effective at light salt game despite its compact body.

38g Size:60mm / Hook:F#13 R#6 / ¥780

28g Size:54mm / Hook:F#12 R#8 / ¥740

Has been designed for a slow falling speed and has a fluttering action on the fall, which allows long span fishing and target fish such as rock fish. Its action and speed appeals to feeding habits rather than creating just a reaction bite.

CIW CRB GGD SBP SPK WRD ZBG ● ZGP ●

GALLOP Swimmer

28g Size:70mm / Hook:F#8 R#6 / ¥770

38g Size:78mm / Hook:F#6 R#6 / ¥800

To enhance an ability to hook fish from the bottom, a hook is also equipped on belly part of this metal jig. Hook size is set big as much as possible without hung up trouble. It makes tight roll action at slow retrieve, and it swings widely like a spoon when you retrieve fast. You are able to make its action by retrieve speed with light water resistance from a lure. The light water resistance makes you detect bites of fish sensitively, and enjoy fishing without tiredness.

GALLOP Assist FALL EDITION

15g Size:53mm / Hook:F#11 R#10 / ¥600

20g Size:59mm / Hook:F#11 R#8 / ¥680

30g Size:67mm / Hook:F#12 R#6 / ¥740

40g Size:74mm / Hook:F#13 R#4 / ¥780

60g Size:84mm / Hook:F#14 R#3 / ¥850

The sharp edge and the outline of the body which gives a compact and thickness are characteristic. The action of falling that reproduces the movement of the weakened bait induces the explosive bite. The concept model specialized in the falling of a metal jig.

▲ No standard of 15g

GALLOP ASSIST

20g Size:63mm / Hook:F#11 R#8 / ¥680

30g Size:72mm / Hook:F#12 R#6 / ¥740

40g Size:79mm / Hook:F#13 R#4 / ¥780

60g Size:90mm / Hook:F#14 R#3 / ¥850

The center of gravity is set slightly backwards makes fluttering fall and it starts appealing right after dropping to water surface. No matter how you fish, this lure keeps attracting fish all the time until you pick it up. Gallop assist is easy application weapon. And assist hook helps hooking ratio dramatically, You will not miss chances.

Athlete 13MDS

Size: 130mm / Weight: 29g / Type: Sinking / Hook: #4 ¥1,950

The ultimate Sardine imitation, designed by Ryo Ikuma

Every autumn, the shores from Osaka to Kobe are bustling with sea bass and blueback feeding on the large Sardine schools. We have hunted the area and tested, not only Jackson's lures, but various other brands during the Sardine season. Our final conclusion has the "Athlete 145S" as an absolute standout performer. With its perfect baitfish profile outline, its action and flight-distance and it's immeasurable ability to catch fish after fish which led to countless captures of lunker sea bass and yellow fish. This unique style of fishing requires a particular depth for the lure to run at, and keeping in mind to make this an easy lure to use, so we have adjusted the design to get the Athlete running at the correct depth and get it to the depth quickly and easily. Now reaching the required depth is simple cast after cast, getting the Athlete in the strike zone every time! The legendary "Athlete 145S" just got better! The revised Athlete has 3 design focus points that make the best even better. First, a crucially designed bib lip shape to enable the lure to travel at the correct depth and reach it fast, while maintaining its action. Second, the body shape enlarged to move more water and increased sonics, therefore becoming more noticeable to all predators. Lastly, the weight transfer size has been changed from 4pc.(6.6mm) to 2 pc. (8mm) to produce a tight baitfish profiled action at all retrieve speeds. Color selection was completely renewed with amazing colors to suit the style of fishing the new Athlete is designed for. We worked with respected experts in the Sardine baitfish style of fishing and everyone accepted the offer willingly, acknowledging the Athlete's already high status, and enjoyed the reconstruction of this lure. Upon completion of much research and development, "The New Athlete 13 MDS" was born. We are confident in the results and are pleased we have a new world class lure that can proudly carry the legendary name of "Athlete".

Athlete 12SSP

Size: 120mm / Weight: 33g / Type: Sinking / Hook: #4 ¥1,800

For shallow off the shore, new 120mm sinking pencil was born, designed for surf and flathead fishing which are getting popular now.

We questioned if there were any lures that had good casting ability but maintain a slow retrieve speed without snagging the bottom but rather travelling above it where flounder or flathead are waiting to strike. Athlete 12SSP was designed to place the weight backward since it is focused on flathead fishing, which is very different from other sinking pencils. The flight attitude and casting ability are stable despite of its big body size, and is comparable to metal jigs. It falls plumb down to the bottom quickly and swims smoothly with a rolling action which changes to wobbling roll action with a faster retrieve, the action can be felt easily through the rod tip. Its equipped with 3 trebles as not to miss any strikes from flounder or flathead and due to its casting ability and action it is also capable of catching blue fish and sea bass too.

Athlete 12SS/14SS

12SS Size: 120mm / Weight: 21g / Type: Sinking / Hook: #5 ¥1,900
14SS Size: 140mm / Weight: 25g / Type: Sinking / Hook: #4 ¥2,100

The legendary lure, Athlete. It inherited the action that rolling in slow retrieve, and wobbling rolling action increases with the retrieve speed. Also combined with excellent stability performance under any situations.

Artist FR70/FR80/FR105

70mm Weight: 6g / Type: Sinking / Hook: #12 / ¥1,600

105mm Weight: 15g / Type: Sinking / Hook: #4 / ¥1,700
80mm Weight: 8g / Type: Sinking / Hook: #10 / ¥1,600

It corresponds to "Super-Fast Retrieve" of day-game. It equipped meandering action from side to side in order not to be given up by fish when super-fast retrieve. It can correspond to not only fast but also dead slow, and has the high stability and versatility from the trolling of night game to ultra-fast retrieve of the day game, and twitch and jerk.

Athlete DASH Tune

Ultimate Design for All Game Fish
Size: 90mm / Weight: 14g / Type: Sinking / Hook: #6 / ¥1,700

The weight added to the rear parts of athlete 9S. The feature of this model is incredibly increased distance and the changeable action by speed range. The flying distance increased by 10m longer than athlete 9S. "The stability of flying posture" is the big point more than increasing weight of 1g.

Athlete 7S/9S

7S Size: 70mm / Weight: 7g / Type: Sinking / Hook: #10 / ¥1,700
9S Size: 90mm / Weight: 13g / Type: Sinking / Hook: #6 / ¥1,700

Jackson's flag ship basic minnow which sells long time. Achieves stable rolling and wobbling action. Strong to the flow, the stable retrieve performance is also excellent. These stable elements accomplish "anyone can use comfortably, a user-friendly lure".

Pin Tail 20/35

20g Size: 70mm / Type: Super Sinking / Hook: #10 / ¥1,600
 35g Size: 90mm / Type: Super Sinking / Hook: #6 / ¥1,700

This lure achieves excellent results across the country here in Japan. It has continued to fascinate all kind of fish eaters such as sea bass of cause, Amberjack, bonito, flounder, hair tail.

Pin Tail EZ 20/28

20g Size: 75mm / Type: Super Sinking / Hook: #6 / ¥1,600
 28g Size: 90mm / Type: Super Sinking / Hook: #4 / ¥1,600

In addition to the main concept of pin tail series "overwhelming distance", The basic performance is developed that it can be handled easily by anyone. The stability of the swim from medium to fast retrieve is dramatically improved.

Pin Tail 48

Size: 105mm/Weight: 48g / Type: Super Sinking / Hook: No hook / ¥2,000

Surf glide

2Hook Size : 130mm / Weight : 23g / Type : Floating / Hook : #4(2hook) / ¥1,650
 3Hook Size : 130mm / Weight : 23g / Type : Floating / Hook : #5(3hook) / ¥1,650

Surf Glide was developed based on a strong theme of "casting ability" for surf fishing. Its design was purely to keep a maximum casting distance in windy conditions particularly in the surf, representing the name of surf glide. The internal weight system is the key to its casting ability, the weight shifting to the rear of a long lure keeps the forward trajectory. The body is made from polyhedral and giving it maximum buoyancy, so the lure can sustain with 9mm large tungsten weights. The weight system has a double benefit with an energetic wobbling roll action when retrieved, the larger body shape and profile is a baitfish profile that can be detected easily even in white water conditions. There are two options available with hook set up, with 2 or 3 treble hook can be used with this lure and still remain effective in the estuary or rugged offshore. The weight transfer system is nothing new, but most long cast minnows have poor actions, but the Surf Glide has both elements covered. Surf Glide is a floating minnow of high performance for seabass and will be very suitable for many anglers.

MUSCLE SHOT

Size: 90mm / Weight: 30g / Type: Super Sinking / Hook: #4 / 1,700

The lip is designed like a lower jaw to prevent body from coming up from surface. Fall posture is naturally horizontal. Center of gravity is put the lowest level and wire through system achieve high strength to its body.

MUSCLE SHOT MAGNUM

Size: 115mm / Weight: 45g / Type: Super Sinking / Hook: #2 / ¥2,000

The features of Muscle shot are inherited with size 11.5cm and 45g. Target is both shore and off shore, with wide range of fish such as Bonito, Mackerel, Tuna, Amberjack and Dorado.

海 KAIKEN 剣

110mm Weight: 33g / Type: Sinking / Hook: #1 / ¥2,200

Chinukoro vibe

ちぬこるバイブ

8g Size:36mm / Weight : 8g / Type:Sinking / Hook:#8(Double hook) / ¥1,000
 12g Size:39mm / Weight : 12g / Type:Sinking / Hook:#8(Double hook) / ¥1,100

Chinukoro vibe is a special vibration bait for seabream, Blackhead and yellowfin seabream, this vibe has great appeal to seabream and other species looking for food in shallow water like shrimps and crabs etc. We recommend using "Chinukoroli" and "Chinukoro vibe" properly to expand the possibilities and catch rates of seabream fishing. Two things below are the points the team focused on.

- 1. Absolute casting ability**
 This vib comes in 8g and 12g, which is a little lighter than regular seabass vibration baits, however it flies perfectly because of its unique body shape and exquisite weight balance, it will seriously blow your mind. The 8g vib is equivalent to 10g of Chinukoroli, and 12g ones flies even further, also it flies straight with stability and accuracy so the angler can always hit the target.
- 2. Snag free**
 This vibe is relatively snag free just the same as Chinukoroli, even if it gets stuck in the rocks, the body rises up using the tow point as a fulcrum enabling the angler to release the lure easily. It falls to the bottom with the hooks facing up, which appeals eliminating the snagging problems with most vibration baits. The design and hook choice and placement will allow the angler to fish heavy cover and rock covered bottom where most vibrations will get snagged up, its action is super sensitive and the angler can finesse the lure and feel every bite.

Chinukoro craw

ちぬこるワグロー

Size:1.7in / Quantity:8 / ¥580

Chinu is tend to stay at the bottom, So this crustacean worm is developed for specialized for chinu. It is a perfect match to rigs for bottom such as jig head and TX rig. Best match with our final weapon for bottom conquest, Chinu koroli.

Chinukoroli

ちぬこるU

5g 7g Size:31mm / Type:Sinking / Hook: #6(Single) / ¥820
 10g Size:32mm / Type:Sinking / Hook: #6(Single) / ¥920

New species of crustacean plug. This chinu Koroli lure increases the avoidance capability caught by its own unique gravity. It keeps avoiding stuck, You only need to retrieve slowly to drag it at the bottom to get black sea bream.

EBI PANIC

Size:70mm / Weight:4g / Type:Floating / Hook:F#10 R Original assist hook / ¥1,600

Cast and twitch as a pencil bait makes ebi panic as if it is in 'Panic' like running away from predators. It has dog walk action and its tail cup creates sweet pop sound. And also making splash precisely.

R.A.POP

Size:70mm / Weight:7g / Type:Floating / Hook: F#8 R#6 / ¥1,500

The popper "R.A.POP" is designed for popping game of a black sea bream that has generated and spread to the whole county in Japan. It has been condensed the special performance for against a black sea bream such as "favorite pop noise of black sea bream", "standing posture for easy predation"

NEW BOTTOM MAGIC

55mm Weight: 5.6g / Type:Sinking / Hook:#8 / ¥1,200
 65mm Weight: 7.6g / Type:Sinking / Hook:#6 / ¥1,300
 75mm Weight: 10g / Type:Sinking / Hook:#4 / ¥1,400

The Bottom Magic has always been a great lure for trout, but its unique shape and action has been recognised as a very effective lure in larger sizes as well and in particular in saltwater situations. The two new sizes of 65mm at 7.6gm and the 75mm at 10gm still have the action of the 55mm, and now in a range of new fish catching colours that suit both fresh and saltwater fishing. Fitted with strong and sharp double hooks for the ultimate hook up rate.

DEAD FLOAT 60/80

60mm Weight:5.7g/Type:Floating/Hook: #8 / ¥1,350
 80mm Weight:8g/Type:Floating/Hook: #8 / ¥1,450

The lure to capture fish from surface to 30cm below. It can create strong resistance wave by original lip shape, can adjust the strength from strong to sensitive waves at sub-surface due to the variable action system.

RISKBAIT

Size:70mm / Weight:7g / Type:Floating / Hook: #6 / ¥1,500

Riskbait is pursued necessary elements to make a bite. The most important thing is strength of pushing water. Pushing water makes higher interest of fish more than slide action. Combination with RA pop makes respond to many situations to get bites!

Debu nyoro

DN85 Size:85mm / Weight:11.5g / Type:Sinking / Hook:#10 / ¥1,500
 DN120 Size:120mm / Weight:40g / Type:Sinking / Hook:#12 / ¥1,800

It creates slow wobbling action on steady retrieve. It swims S-curve when the head is on surface but when you give short jerk it moves unexpectedly. Also dart action can be made when retrieve speed is changed.

Nyoro Nyoro

60mm Weight:3.5g / Type:Sinking / Hook:#10(Single) / ¥1,100

The mysterious life feeling and the one and only potential, are expanding the playing field beyond the boundaries. For 60mm we offer rockfish colors for anglers who enjoy rockfish game. Its super slim body promises stable cast distances even under strong wind.

Pipí Ring

Size:1.6inch / Quantity:8 / ¥440

The Pipí Ring has been designed and then developed with over one year of research behind it. The design team have researched and recorded feeding information of fish like Rockfish and Horse Mackerel and produced the Pipí Ring accordingly. Taking care to imitate size and profiles of the food for these species. It matches with the Jazz jig head system which size and hook strength and size range suit the Pipí Ring and fishing styles perfectly.

Tiny Squid

Size:1.8finch / Quantity:6 / ¥440

The Tiny Squid inherits the back slide action, only in a smaller version, its so life like and a perfect baby squid imitation that's meant to be in the ocean. No need to use lead because of its nail sinker, which eliminates fish cautiousness simply by changing the direction of hook, it works with retrieving and drifting perfectly. The body profile of the Tiny Squid has been designed to enable sinker use in the pockets and its body shape prevent rolling, even when back sliding. The Tiny Squid is just perfect for rockfish and can also be used with a jig head. 1.3g tungsten nail sinker is suggested for deep water spots such as from a boat or tetra. 0.9g is recommended for shallow water. Fluorocarbon line is preferred to assist in the backsliding action. After the backslide, slowly retrieve and let the Tiny Squid float, then pause causing the Squid to backslide again. This technique imitates a real Squid and its action is life like and irresistible predators.

Staple Fry

Jr. Size:1.4" / Quantity:12 / ¥550
 Jr-L Size:2" / Quantity:12 / ¥580
 Long Size:2.4" / Quantity:12 / ¥580

"Staple Fry", in order to earn a distance with the light weight jig head, the basic shape of the body has been reconsidered. The peak of the body volume was extended to the rear body, and further by the cross section makes angulate not circular, the volume of the body itself increased.

Pygmy Box

There are a variety of fish when you go to sea depending on season. The lures jumped out of treasure box in order to play with these fishes at light salt game all year round. They don't have the word "target fish". Any fishes can be caught.

Pygmy HEAVY MINNOW

Size: 39mm / Weight: 3.8g / Type: Sinking / Hook: #14 / ¥850

Pygmy Lipless

Size: 48mm / Weight: 3.9g / Type: Sinking / Hook: #14 / ¥850

Pygmy Vib

Size: 39mm / Weight: 3.6g / Type: Sinking / Hook: #14 / ¥850

Pygmy HW SInPEN

BLAST BEATS

The spinning model adopts Fuji's VSS seat and TVSK hood, reducing looseness with unlatching.

The casting model adopts Fuji's micro trigger seat, a trigger without bulkiness corresponds to a delicate approach and power play as well.

It is natural that if the fishing style is different the rod shall be selected accordingly, we selected different elastic carbon sheets of 24t, 30t, 36t, 40t for each model, and created blanks suitable for each style with a feeling only achieved as if it is a high end product.

The lightest model with thin rings and titanium frames, downsizing became possible by expanding apertures, and it also became possible to use a smaller guides.

BBS-511XL-AS

BBS-64L

BBS-64L-XLST

BBS-69L-ULST

The new bass rod series from Quon which released the ultimate standard rods for beginner to tournament anglers, with rod actions such as Trickster and Bastard.

These are the ultimate standard rods for beginner to tournament anglers, with rod actions such as Trickster and Bastard. These are the ultimate standard in rods with a reasonable price but diverse line-up and advanced blanks that are full of detail. The lineup suitable to various tackle, field and fishing style and all with different qualities, one by one rather than just a multi bass rod such as dedicated plugging, jig dedicated model, or for tough conditions model.

The blanks have different materials for each model for delicate finesse rods, it is based on 36t carbon material with superior sensitivity, 24 to 30t for moderate stickiness, 40 t carbon material for heavy rods requiring more power. By subdividing for each model and combining different kinds of different elastic materials, we have succeeded in producing specific rod actions.

In the search for further strength, the blank sheets are wound not only in one direction (0 degree) but also in the direction of 90 degrees and tightened with a carbon tape in the direction of 45 degrees. The multi-axial structure dramatically improved the rigidity and twisting and crushing. The guide is a stainless steel frame SiC guide made by Fuji Industry Co., Ltd. which is excellent in durability, this series also adopts a new standard thin ring "SiC-S". Even compared to the current SiC ring, it is lighter with higher sensitivity due to the weight reduction and the inner diameter of rings have also become wider. It also helps to improve the casting distance. The reel seat of the baitcasting model adopts a NEW micro trigger seat manufactured by Fuji Industry Co., Ltd. Easy to grasp, trigger with no wasted part and excellent operability. EVA is applied for grip. It has excellent durability and does not slip on rainy days and wet hands. With the fusion of technology cultivated with Quon and advanced parts, everyone enjoys the essence of bass fishing casually, these are truly the ultimate standard in bass rods.

Specification SPINNING MODEL

BBS-511XL-AS The very best finesse

ALL CARBON SOLID

An all-carbon solid model which inherits the flow of super trickster and trickster, the scraped tip can be delicate with a natural action that gives the lure a sense of life. In addition to being able to fish a light rig, it also copes with super tough condition game with super light weight rig. Suspension performance of the full solid material without any loss sensitivity that enables the use of thinner lines that continues to give pressure to bass while protecting the line from an intense fight. With the short length of 5 feet and using the thin SiC ring, weight reduction is achieved and greater operability than ever before. Perfect for small rubber from 1/32 oz to 1/8 oz, lightweight rig such as wacky and downshot, and also suitable for fishing the extremely small rig necessary for chasing small mouth bass.

BBS-64L For The Shading specialists

Light versatile spin rod specialized in the use of small hard plugs such as flow shad, a sticky fast tapered blank based on a medium elastic carbon material which is superior in casting performance and operability using small hard plugs. Its an exquisite length suitable for Run & Gun in a vast field and also super accuratet, it will not limit the field nor the fishing style. A spinning rod capable of versatile games with a plug such as a shad.

BBS-64L-XLST For The Worming & Small rubber jigs

SOLID TIP MODEL

Tubular + Solid Tip model which is an essential model in finesse fishing, with a carbon solid tip which can manipulate the lightweight finesse rigs used, it easily detects a faint bite and combines a high elasticity carbon tubular harnessing power required for bass. A model specialized for finesse worming, such as a small rubber swimming baits and finesse worming such as rig and down shot of 3/16 oz. or less.

BBS-69L-ULST Finesse for the long casting

SOLID TIP MODEL

Long finesse rod of tubular + solid tip, a long rod that combines the evolved multi-axial high power carbon tubular butt with a UL-class carbon solid tip capable of delicate operation with sensitivity for big bass. A long length of 6.9 ft. corresponds to a rig of long line leader such as down shot and light caro, etc. A perfect long casting rod and very suitable for long distance from the bank fishing styles.

MODEL	Length (ft / cm)	Power	Lure Weight	Line	Action	Self Weight	Collapsed Size	Piece	Tip Diameter	Carbon Fiber	Other Materials	Price

BLAST BEATS SPINNING MODEL

Specification CASTING MODEL

BBC-61L-AS The Makimono Special

ALL CARBON SOLID

An all carbon solid bait rod composed of solid carbon from the tip to the butt, with a regular taper blank that do not kill the action of hard plugs used when chasing bass. While using 24t solid carbon we characterized the unique stickiness of this rod that makes sure you won't miss the bite. Its action is very suitable from the hook up to applying load to stop the fish during the fight, while using lightweight and improved thin SIC rings. Perfect for use with a crank and shad. Makimono special specialized in plugging to cover minnow and also top water plugs.

BBC-68MH Jigs & Texas are my favorite

A model specialized for rubber jig and Texas rig, it consists from 40t carbon material with high elasticity and hardness and 30t carbon for stickiness with power. Sensitivity is a must to deal with bottom fishing so this rod is excellent in jig operability and has enough power to fish in cover and weed. Exquisitely balanced tip is not only hard and has great hooking ability to hit the upper jaw with a hook while keeping a lure in the mouth of the bass. This one is for anglers who enjoy using Rubber jig and Texas rig as their main lures.

BBC-71XH The Versatile Sniper

Extra heavy versatile rod for heavy cover fishing using lures such as Texas Rig, Rubber jig, frog and power games that require big baits. Blanks are highly elastic but also sticky and have exquisite settings that combine the sharpness of manipulating heavyweight rig as desired and the ease of big bait use. A butt that's reinforced with a strong shaft with multiple shafts and improving its rigidity and exerts enough power to handle fish in the monster class lurking in the heavy cover.

BBC-62ML-LST So-called finesse

SOLID TIP MODEL

A bait finesse rod that combines flexibility and rigidity with L class carbon solids with ML class powerful tubular blanks. Lightweight Texas, down shot, lightweight rig such as small rubber and Neko jig. The ability to sense the change of shaking and bottom, it has a delicate tip like a spin rod feeling. With Bait's unique rework its a renewed ability of accuracy and performance, but it can achieve aggressive finesse fishing styles also. Tightened with carbon tape, the multi-axis torqueful tubular body exerts power that will not be defeated by big bass, we pursued the essence of bait finesse, approaching silently, and conquer with power.

BBC-610M The Wide Searcher

Rod specialized in using spinner baits up to 3/4 oz, cranks, vibrations baits as well. We set the medium elastic blanks based on 30t carbon to a regular taper and have developed the excellent hook up rate style rod while not losing any sensitivity or changes to the lures action. Its 6.1 ft length is excellent in long range performance and can search wide and far and a versatile model combining not only long cast but pinpoint casting accuracy.

BBC-73MH Flipping, Swimbaiting, a versatile weapon!!

Cover a wide range from light flip to swim bait, it is a long rod which has superior long casting capability and it is a long rod which can be applied to flipping, a long leader rig like Caroliner, casting over bush and tight range control. The blank, which combines 40t and 30t of carbon material in a well-balanced manner, sticks moderately although it has high elasticity, converts it into a combined force by placing weight of lure on the entire rod. With a balanced rod action its a versatile weapon which is suitable for a wide range of lures, from worms and jigs and also hard plugs and wire baits, small and medium swim baits and big baits.

BBC-85XXH The Prime weapon

Blast Beats custom Swimbait model. The Blast Beats Swimbait rod has been specifically designed to cast and fish larger baits. The combination of materials, taper, guides and grip design all combine to create a rod that is purpose built to use larger baits and catch larger fish with comfort, accuracy and success. The rod uses Fuji SIC guides on a 40 t carbon material and with a longer grip gives this rod the ability to load correctly when casting larger baits long distances. The Blast Beats Swimbait rod is suitable for lure weights from 3-5oz (120g-140g) and line PE 30-80lb.

SUPER TRICKSTER NET

A landing net indispensable for anglers on bank. Trickster net, which became a standard has been improved and create "SUPER TRICKSTER NET". A landing net for a bass that assists the situation where landing is difficult, such as a high pressure field that challenges by narrowing the line to the limit, an approach from a high place that cannot reach the surface of the water, a scaffolding and unstable steep slope. By adopting a one-piece oval frame, the frame is more easily catch fish, and it has excellent strength. The mesh rubber is adopted as a grip, promising a more reliable hold. Additionally, equipping air vent holes and a carabiner to prevent dropout. Easier to handle, evolved more practically. A super trickster net that extends the breadth of your strategy without missing the chance is a must item now.

Air vent holes are equipped for smooth operation.

A carabiner is installed prevent from dropping.

IGARABA

—イガラバ—

Versatile and modular to suit many situations

Professional angler Makoto Igarashi designed this small rubber jig with his extensive knowledge.

Its concept is to push water and allow fish to find the jig through the movement quickly.

Makoto Igarashi has used this lure at clear water, artificial lakes and hazing water, which means it is versatile and effective. The Jigs strong points are the number and width of silicon rubber and an angle of 90° eye and the thick rubber skirt enables it to grab water well and allows anglers to feel resistance as it moves. The skirt is sparser than normal, which gives fast falling and an easier search. 90° angled eye enables to keep the body horizontal while falling and while swimming down.

This small rubber jig is versatile and can be used in many situations.

2019 NEW Part of the modular weedless jighead system

Iga Jig Head was born based on Iga ruba produced by Makoto Igarashi. Its basic 90° eye is effective for swimming and searching bottom without snagging.

IGA JIG CHATTER

—イガジグチャター—

Increased vibrations and sonics

The design objective for this lure was to have tight action and allow anglers to feel the pulsing vibration and sonics of the lure right through the rod and to the hands, and so we have the Iga Jig Chatter.

A larger flat bladed head is used to create a stronger resistance and move more water and entice predatory species and allow the angler to feel this movement also, the larger bladed head also allows the lure to hold its position in the water column and not rise on retrieve.

The combination of the flat blade on the head and the small willow blade on the belly enable anglers to feel the lure movement, along with the combination of both blades actions gives the lure a unique action and also flash to entice the strike.

The head colours and matching skirt configurations finish the Iga Jig Chatter well.

The Iga Jig Chatter gives the angler a unique action, feel and a range of fishing situation options.

2019 NEW Cyarl Blade

life like and functional and snag free

Cyarl Blade was originally designed as a trout fishing lure, but it's snag-less function and size is effective for bass fishing also.

The body size, hook and blade movement matched with the belly double hook and larger stronger rear single make this suitable for larger trout and of course bass and has been completely tested on both species.

This new model Cyarl has a floating and sinking versions that swims, and acts just like a frog, sitting perfectly life like on the pause to tempt fussy fish.

The placement of the hooks and the balance of the Cyarl when retrieved make it a very snag proof lure and allow great hook up rates and enable the angler to fish among structure, while the blades vibrate to entice the strike.

The Cyarl Blade has been design with imaginative innovation, and has maintained practical function.

Mastering the art of middle depth fishing will open a new door to bass fishing! Professional angler Makoto Igarashi supervised this IgaJig Spin as a secret weapon to become a middle depth master. When seabass and other species are not eating from the bottom nor in shallow, anglers can aim at middle depth not knowing where and whether the lure is moving right, but this is where IgaJig Spin comes in. We researched throughly the balance of weight and blade that so the anglers can feel every piece of the lure's movement. Being able to know what your lure is doing and where its placed in the water column wil result in more catches. The action can be felt in any depth and retrieve speed through the rod tip into the rod grip. This lure is absolutely a saviour for middle depth style of fishing, but it has great sensitivity and its abiiities have expanded so it can be useful not only in the middle depths but in shallow water situations also. A new world and possibilities are waiting for you!

Prism

etc
Black bass その他
Size:120mm / Weight:17.5g / Type:Floating / Range:1.5m / Hook: #6 / ¥1,800

The key to the Prism is that it floats almost parallel, meaning the lure on the opause has a natural posture thats so appealing to fish. The Prisms design and bib shape keep the lure always swimming in the correct depth, even during a long cast its stay in the shallow strike zone. How to use, recommendations are stop & go. The best method is for a retrieve and pause method using twitches of the rod tip maximising the parallel rise and the shaper lines of this lure that reflect a tempting flash to fish of many species. Of course with its bouyancy it can be bounced through structure and over rocks easily. Another retrieve method is by using strong strokes of the rod and push water then use long pauses to entice the bite, by using this retrieve the angler is inviting the fish from a distance to strike. The Prism is a technical lure, but easy to use, its shape, bib materials and action are unique and in testing has been a proven fish catcher.

FLOW SHAD

etc
Black bass その他

FLOW ZERO Size:56mm / Weight:5g / Type:Floating / Range:1m / Hook: #8 / ¥1,650
FLOW II Size:56mm / Weight:5.2g / Type:Floating / Range:2.1m / Hook: #8 / ¥1,650
FLOW I Size:56mm / Weight:5g / Type:Floating / Range:1.4m / Hook: #8 / ¥1,650
FLOW I -CRANKIN' SPEC- Size:60mm / Weight:6.8g / Type:Floating / Range:1.4m / Hook: #7 / ¥1,650

Next generation shad developed as floating type not suspend which is standard lure to aim exactly where you need to cast.

ムシイイロ MUSHI IRO

etc
Black bass その他

Size:1.25in / Type:Floating / Quantity:5 / ¥700

Musiiiro has been designed to catch selective bass on the surface of the water. The body has been modeled after a real life-sized cicada. Musiiiro's bite-sized body is fat and hollow, which enhances its casting and floating abilities.

Size:2.3" / Quantity:8 / ¥550

Shrimp is so smaller than you think. Warekara 2.3 bass color is made to fish with small shrimp eater.

Primal

Size: 164mm / Weight: 50g / Type: Slow sinking / Hook: #1 / ¥2,200

Big fish require big baits, and big fish can be fussy and smart, hence why they have grown to be large predators, so a larger bait has to be perfect in every way--introducing the Jackson Primal!

We have designed this bait with advice and collaboration from a global team of big fish experts, and ensured that all the crucial features of a beautiful large hard bait are included.

It's been intensely tested from its action through to its fish catching ability, and of course with big baits it's durability. Its segmented 164mm body has three stages which give the lure its life like action, and importantly at various retrieve speeds, and it's weight balance has it falling very naturally and at 50 grams it's suitable to fish any level of the water column and can be cast long distances. It's hardware and durability are up to the task of the biggest fish and finished off with a life like body shape, soft rubber fins and a colour range that has an amazing attention to detail to tempt any large predator.

Trout Unlimited

With an accumulation of techniques in the process of developing "Kawasemi Rhapsody" we have accomplished the ultimate comfort rod which has not only a super smooth feeling from cast to retrieve but also ultra sensitivity. A focus was placed on the tip construction to keep sensitive to every bite, to allow this to happen we used low elasticity materials in the tip to enable the angler to sense every touch that occurs. Its fitted with "Sic-s" which are the light weight model guides of the previous "Sic". The blank has been cross wrapped oblique to prevent any kinds of twisting and gives the rod a smooth feeling in transition from cast to fighting a fish.

Specification

TUSS-452UL

A perfect rod for narrow streams where the angler requires ultimate control, and is suited well to any micro sized lures, and is comfortable to use.

TUSS-451ULL-AS ALL CARBON SOLID

This rod enables the angler to have complete control over the lure in small river situations, using the solid construction with great elasticity.

TUSS-492L

This is the versatile model, and can cast and retrieve a wide range of lures from spoons through to heavier weighted minnows.

TUSS-501ULL-AS ALL CARBON SOLID

With an all solid blank this rod is designed for use in various bigger water situations such as head waters and wider more open water.

TUSS-532UL

This model is perfect for not only casting lighter lures like floating minnows and spoons in wide streams, and with its length gives good casting distance and lure control.

TUSC-432L

A short length bait casting model that allows you to fish more technical styles in river fishing and will be suitable for any place you want to go.

Kanasemi Rhapsody

What if the casting distance is extended enough to experience more than it has been so far. By adopting KR guide system, the grip length with an emphasis on its balance and the blank can make good swing, it changes to a casting distance without waste of power. You can search a wide range without any stress. At the point that isn't required a long distance, you can concentrate more about the accuracy of casting. The point you can aim more accurately is spread and the rhythm of game can be made easier. You can control a lure more delicately.

NATIVE MODEL

Specification | SPINNING MODEL

TULN-3112UL

It is an ultra-short rod make fishing in headwater has many obstacles, such as a tree covered the overhead and big stones pushing out from left and right, at the time of casting comfortable. This short length expands the flexibility of the cast.

TULN-432L

The short rod can attack the courses you want to in a wild river. It is just short with not only excellent in operability, but also it has a power can control a heavy-weight minnow freely.

TULN-452ULL

The model made adjustments to control a micro-sized heavyweight minnow easily. Ultra-light tip enable the throw in a pin-point. It controls with berry and bat of light power.

TULN-472L

The optimal length for petite anglers attack to a variety of mountain stream. You can attack without any stress to large places such as a pool and dam that appear occasionally and a small mountain stream.

TULN-492UL

It has the suppleness make easy to bite by a lure mainly use winding such as a micro-spoon or spinner, also excellent in the operability of lightweight minnows such as floating minnow.

TULN-502L

The popular one-piece model of 5 feet made two-piece. It can use a wide range of lures, attack at various points from headwaters to wide river, so it is extremely versatile model for walking and fishing a mountain stream.

TULN-512ULL

Handle 40mm small size heavy weight minnow technically at narrow-river. Even it has sensitivity to handle small lures, it has L power belly and butt responds to sudden appearance of big monsters.

TULN-522L

In open water where nowhere to hide, Long distance is demanded. This rod can cast heavy weight minnow precisely and handle it.

TULN-532UL

This rod goes along well with light floating minnows, Spinners and spoons at relatively wide stream in tributary. When you cast across center of stream, the length enhanced ability of control lures.

TULT-3114UL (Telescopic)

Telescopic model with super short length. ou can pack this rod to your back pack which makes anglers easy to climb up high to mountains to search for fields. It also can be recommended to fisher who enjoy trekking.

40/50/60 NEW COLOR

The masterpiece knows freshwater

The "Kanade" allows the angler to fish slower sections of water column where the fish like to sit, reaching these slower pockets in faster streams is now easier with the "Kanade"

"Kanade" has the ability to fall easily into pockets of water and the semi long bib helps the angler hold that position. Its sensitive action through the rod tip is responsive and gives the Kanade a flashing and rolling action mainly due to its trapezoid style body and has the ability to attract fish on the fall and the retrieve.

The 45mm is a slow sinking type focusing on the responsiveness and accuracy while 40mm-50mm-60mm are heavy versions for faster water and deeper stream sections.

The trapezoid style body gives flashing effectively

Semi-long bib helps the angler to hold that position

The 3 new colors are available only for 40, 50 and 60mm models

Designed For SPEED

These days most minnows employ a low center of gravity to create stability. However the Shizuku 62V was designed for speed, as speed is a key to entice the strike. The Shizuku has a strong darting action when twitched and at speed can move through obstructions creating noise and vibration tempting fish to strike. Its weight balance is crucial to its swimming action and has been designed to specific specifications to obtain the required action, while being conscious to keep its tight action using its coffin shaped lip. Its body is constructed with flat surfaces, which creates various angles to reflect light and flash when retrieved and with its slim baitfish profile body it attracts a wide variety of fish species.

Patent Pending
Vortex Generator

Strong sonic with resin body

Age Sage is a resin based lure that creates a different sonic from the traditional metal vibration lure. There are two weights, 2gm and a 3gm model. This gives the angler the ability to fish various water depths effectively. There are two tow points to enable the angler to fish different actions with the rear eye for vibration, and front eye controls movement for a more lifelike appeal. A great feature of the resin body is the ability to have translucent colors which incorporates both soft and strong appearances.

Athlete 55S FH

Size: 55mm / Weight: 3.2g / Type: Suspend / Hook: #12 / ¥1,300

Athlete 55S was developed as a small sinking minnow for light salt, which is well known among many anglers. Based on its success the Athlete 5.55 FH has been designed and made into a suspending minnow. A suspending lure is perfect for fussy fish and fish that need a more finesse approach and the Athlete 5.55 FH allows the angler to entice those fish that are normally difficult to catch. Now with the new model anglers can now approach fish in stronger currents and also fussy fish living in stronger water with this new model.

Athlete 9JM

Size: 90mm / Weight: 33g / Type: Super Sinking / Hook: No hook / ¥1,500

The Athlete 9JM is a heavy weighted lipless minnow, the lures shape and formation give it great stability in the air and extra casting distance. Despite the heavy weight the design and shape of the 9JM has been carefully crafted to ensure the lure has the correct action using multiple retrieves, from the slow to high speed retrieves. The ability of the Athlete 9JM to achieve various actions is due to the placement of the tow point and its positioning above the centre of gravity, allowing the angler to impart actions simply by varying retrieve speed. The Athlete 9JM is an extremely versatile lure, a crossover of minnow and metal jig styles. We happily offer the product at cheaper price only with split ring and no hooks to let each angler use preferred hooks. It is useful not only for Salvelinus laucomaenis and Cherry salmon in Hokkaido but also for flounder or blueback.

Artist FR55

Size: 55mm / Weight: 4g / Type: Sinking / Hook: #12 / ¥1,500

The FR55 has a very stable swimming action when it is retrieved quickly using its low center of gravity, this stability allows it to be used in fast flowing streams and rivers. Its action is a side to side roll and when paused, or on the fall it holds a natural horizontal position, making it suitable for life like presentations in fast and still waters.

Trout Tune

Normal type Size: 55mm / Weight: 3.5g / Type: Sinking / Hook: #12 / ¥1,300

HW type Size: 55mm / Weight: 6g / Type: Super Sinking / Hook: #12 / ¥1,500

Cast ability, water resistance and action sharpness, a standard model with well-balanced elements required by anglers. Two weights have been placed at its center that have been designed to make it easy to grip water on the lip while keeping a natural sinking posture by making the front side slightly heavier.

Trout Tune Floating

Size: 55mm / Weight: 3g / Type: Floating / Hook: #12 / ¥1,300

In order to catch more fish, Jackson's legendary lure Athlete series has been tuned to be the one for trout. This lure can be controlled by all anglers with ease, and at the same time, you can feel it reacts tactfully to your will and techniques.

Cyarl Blade

Size: 35mm / Weight: 3.5g / Type: Sinking / Hook: #6(Single) / ¥1,300

In areas of heavy cover and weedy areas lures are required to have snag-less function, the Cyarl Blade has legs at each side of a single hook. Its legs help the lure leapfrog the structure. The blades act as an attractant and with a well placed hook the hook up conversion rate is increased. This Cyarl blade is totally innovative lure and considered by many anglers to have "high snag-less function" and "high hooking function".

DART MAGIC Native Color

Trout etc
 3g Size:43mm / Type:Sinking / Hook:#14 / ¥1,050
 5g Size:50mm / Type:Sinking / Hook:#12 / ¥1,050

Head is made of solid lead, Body is solid resin, This is remarkable structure. And Genuine sharp 3D action can be generated when you let it sink to bottom and give it large continuous jerk. Trout reacts as if they are gone crazy which you cannot make them crazy with other lures.

Eddy

Trout etc
 3g Size:27mm / Type:Sinking / Hook:#14 / ¥680
 5g Size:32mm / Type:Sinking / Hook:#12 / ¥700

Line entanglement is biggest spinner weakness by body and shaft rotation. To compensate the weakness Eddy has lowered rotation of body even ability of appeal is enhanced.

Cyimo

Trout etc

Size:45mm / Weight:6g / Type:Sinking / Hook:F#14 R#10(Single) / ¥770

The vibration developed for fish in Mountain torrent, the Middle reach, Lake and wide area. There are three line eye holes which make you able to choose to fit to each situation.

Daniel

Trout etc
 NEW 1g Size:21mm / Weight:1g / Type:Sinking / Hook:#12 / ¥650
 3g Size:35mm / Weight:3g / Type:Sinking / Hook:#10 / ¥800
 7g Size:46mm / Weight:7g / Type:Sinking / Hook:#6 / ¥850
 14g Size:57mm / Weight:14g / Type:Sinking / Hook:#2 / ¥900

Daniel is well known for super long castability and the ability to deal with wide range of retrieve speeds, this time The Daniel has a new size in 7 grams and 14 grams for lake and or wide stream fishing. Additionally, Daniel's advantages are not only the castability but also its swimming action that wobble and roll, that is so unique to Daniel. On top of this...Daniel's rear weighted shape is good for high speed falling in deeper water fishing situations. There are a number of Daniel fans in Japan, who have been asking and waiting for this size of Daniel!

鮭男爵 SAKEDANSHAKU

Masu salmon etc
 ¥1,200
 45g Round Size:39mm / Weight:45g 45g Slim Size:77mm / Weight:45g
 50g Round Size:41mm / Weight:50g 50g Slim Size:81mm / Weight:50g

The body is molded with the same lead as the metal jig. Although it is compact, both its casting distance and the simplicity of throwing are sufficient due to low air resistance. In order to ensure that the water flow received by slow retrieve always flows in all directions, it creates enough force to move even under high load conditions with a octopus bait and a bait. By equipping a resin mirror and Mylar sheet, a strong flushing performance is achieved. Furthermore, it has a higher specific gravity than a normal spoon. The torque that is going to move is high and you will not have to wait for the bait to fall. "Guaranteeing the best appeal from the first cast" is the concept of this spoon.

T-Pivot T・ピボット

Size: 35mm / Weight: 2.2g / Type: Floating / Hook: F#14 R#10(Single) / ¥1,250

This is a pencil for trout. Light table action is easy to make by anyone. A treble hook at the belly, Single hook at the tail, This is combination hook style of T-pivot.

MO MK MC CL MB GR GB WA SS GS

KOMET SUISEI

Size: 90mm / Weight: 11g / Type: Floating / Hook: #6 / Range: 0~2m / ¥1,800

80% of the body is aisle for moving weight, which creates a long casting distance. When starting to retrieve the balance weight fixed at a unique position and the weight is to be fixed to the magnet at the front, it creates early swimming action and it grasps water even in a swift stream.

LBG LBS LCL LGG LRG
LSB LYM SBP SLY SPY

METEORA RYUSEI

Size: 80mm / Weight: 15.5g / Type: Sinking / Hook: #6 / ¥1,800

The weight fixed at the low center of gravity acts reliably, even in strong flow and flashing from the extreme flat side can surely attract masu salmon. If you maintain line tension, it will sink with stable posture and it will not be entangled with the line.

LBG LBS LCL LGG LRG
LSB LYM SBP SLY SPY

LIGHT MAGIC

Size: 37mm / Weight: 2.8g / Type: Floating / Hook: #6(Single) / ¥1,000

A slightly fat, small minnow. It is heavier than it looks, but it can easily be casted by beginners. For emphasis on response, a fixed weight has been adopted. With a dead slow, it firmly grabs water and swims well. Furthermore, it is excellent in high-speed stability and it can be used for fishing methods that induce reaction bites by fast retrieve. The action is a high pitch wobble roll. You can make a compact silhouette and let fish imagine insects struggling on the surface of the water. If you add a twitch, it floats while kicking back slightly after submerging, so you can explore slowly using a small retrieve distance. A lure that can catch fish slowly and quickly, over a wide field of shallow area with a small body.

Pygmy Area SERIES

Size: 33mm / Weight: 3.2g / Type: Floating / Hook: #6(Single) / ¥850

The maximum depth is approx. 1.5 m. In order to make it possible to dive abruptly, the clutch portion of the internal weight has been designed from the reinforcement section at the base part of the lip. It is secured with a long weight movement aisle that can not be seen elsewhere and while it is a micro size crank bait, it achieves both long casting distance and deep diving performance. The action has been set high pitch wobbling.

ALB BRP CLR MTB OLP RPK SKD YIK

Kurokawamushi

くろかわ虫

Size: 35mm / Weight: 2.7g / Type: Sinking / Hook: #10(Single) / ¥1,050

Designed to be a real worm. Without re-forming silhouette, It has all cast ability, Swimming skill, Falling attitude, These fundamental functions are satisfied.

Size: 25mm / Weight: 1.3g / Type: Floating / Hook: #10(Single) / ¥1,200

Kumo lure is on, when fish feels shallow layer. Bite right after cast is sure to get, Extensive action are able to be made by rod work.

Cyarl

キャール

Size: 20mm / Weight: 1.8g / Type: Sinking / Hook: #10(Single) / ¥850

Method is have Cyarl run on surface with small splash by continuous twitches. The splash and wave attract fish and fish cannot stop biting it.

Cyarl Float

Size: 25mm / Weight: 1.9g / Type: Floating / Hook: #8(Single) / ¥1,150

Top water plug is being popular these days. Not only seeing exciting bite scene but also overwhelming fish result can be expected. Cyarl float works well on when trout aim on surface. Such as dawn and sunrise, feeding time, insects hatching are the right time for Cyarl float.

TSURI JACK

⚠ Caution when using Rod

1. The material conducts electricity well, please be careful of electric shock by high-voltage line and wiring, please keep your rods away from wirings to prevent fatal accidents.
2. Please be careful of electric shock by lightning, please refrain from using when lightning strikes are present in the area.
3. Use after verifying the safety conditions of the surroundings, It is extremely dangerous if the rod, lure or hook hit each other.
4. Use for fishing purposes only
5. Keep out of the baby's reach
6. In case you broke the rod, please avoid touching the tips since the surface is dangerous.
7. Please cover your eyes with glasses and wear gloves and caps to protect yourself from the damage of broken rods.
8. Due to the material, rods can be broken by distorting, including high sticking the rod and over bending.

⚠ Caution when using Lure

1. Use for fishing purposes only
2. Keep out of the baby's reach
3. Use after verifying the safety of the surroundings
4. The tip of the hooks are extremely sharp, please handle lures accordingly.
