## Return to Shareholders

## Regarding Profit Distribution

en-japan considers the maintenance of a dividend payout ratio of approximately $30 \%$ and the appropriate return of earnings to shareholders according to the operating results in each period, while taking into consideration the use of internal reserves to invest for growth and the maximization of corporate value, to be its fundamental policy. Because it has revised its operating results projections as described above in response to the rapid deterioration of its operating environment, the Company has decided to leave the full year-end dividend for the fiscal year ending December 2009 "undecided" at this time, and will propose the dividend amount after comprehensively considering its full year operating results for the current period and other factors.
