(3) Notes regarding Quarterly Consolidated Financial Statements

(Notes Relating to the Going Concern Assumption)

There are no pertinent items.

(Adoption of Special Accounting Treatment Used in Preparation of the Quarterly Consolidated Financial Statements)

(Calculation of tax expenses)

The Company calculates tax expenses by rationally estimating the effective tax rate after applying tax effect accounting on profit before income taxes on a consolidated basis for the fiscal year including the first quarter of the period. It then multiplies the estimated effective tax rate by profit before income taxes for the quarter.

Note, however, that if calculating tax expenses using the estimated effective tax rate produces a result that significantly lacks reasonableness, the statutory tax rate is adopted.
