The world's first wireless hardware grade crypto key
+
A Service Platform
which offers best security structure to link
people and business together.

It’s time to own your key !
安全至上 企業可以管理自己的金鑰

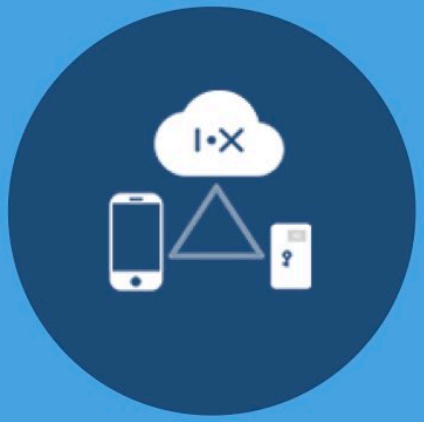
I•X Trio®

It's Different!

I.X 金鑰不一樣

Face recognition or fingerprint 2FA cannot represent as digital signature. IX Trio has hardware encryption key with indelible ECC-SECP256K1 ECDSA digital signature which can servers as a legal validated certificate for enterprise management data access.

Trio service is more than just Encryption..



I.X Trio has a worldwide & unique patented three-key binding security mechanism

I.X Trio is a 2FA mechanism based on digital signature (legal validated) and an internet-to-intranet secure access and data leak protection solution

I.X Trio is also a manageable and auditable system for enterprise

Benefits to
Enterprise when
using I.X Trio
Service ..

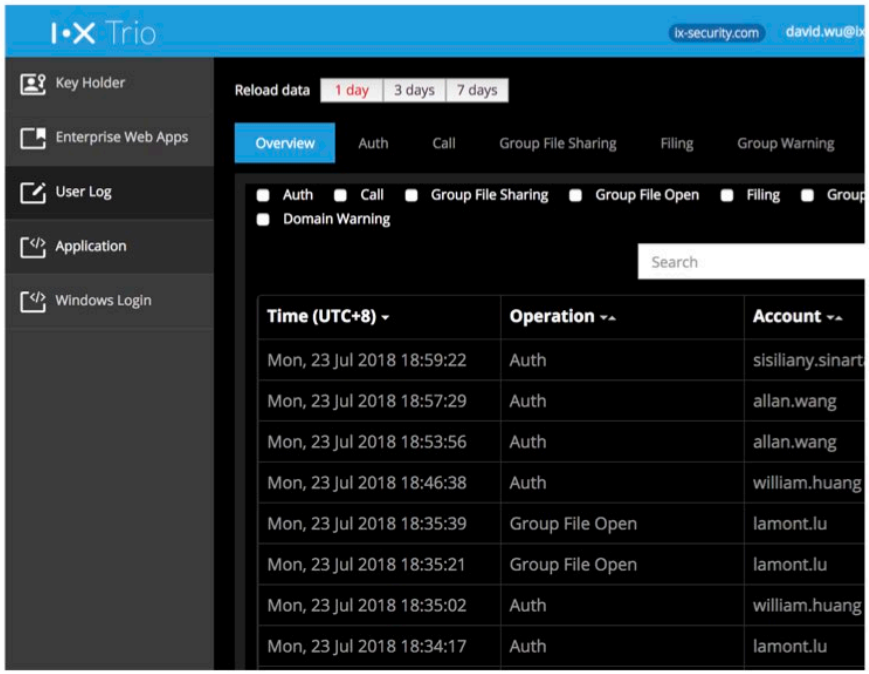
Trio Desktop
(Windows / Mac Desktop App)



Management Console
(Tracking & Auditing)

CASE STUDY

Consulting Firm (Data Leakage)

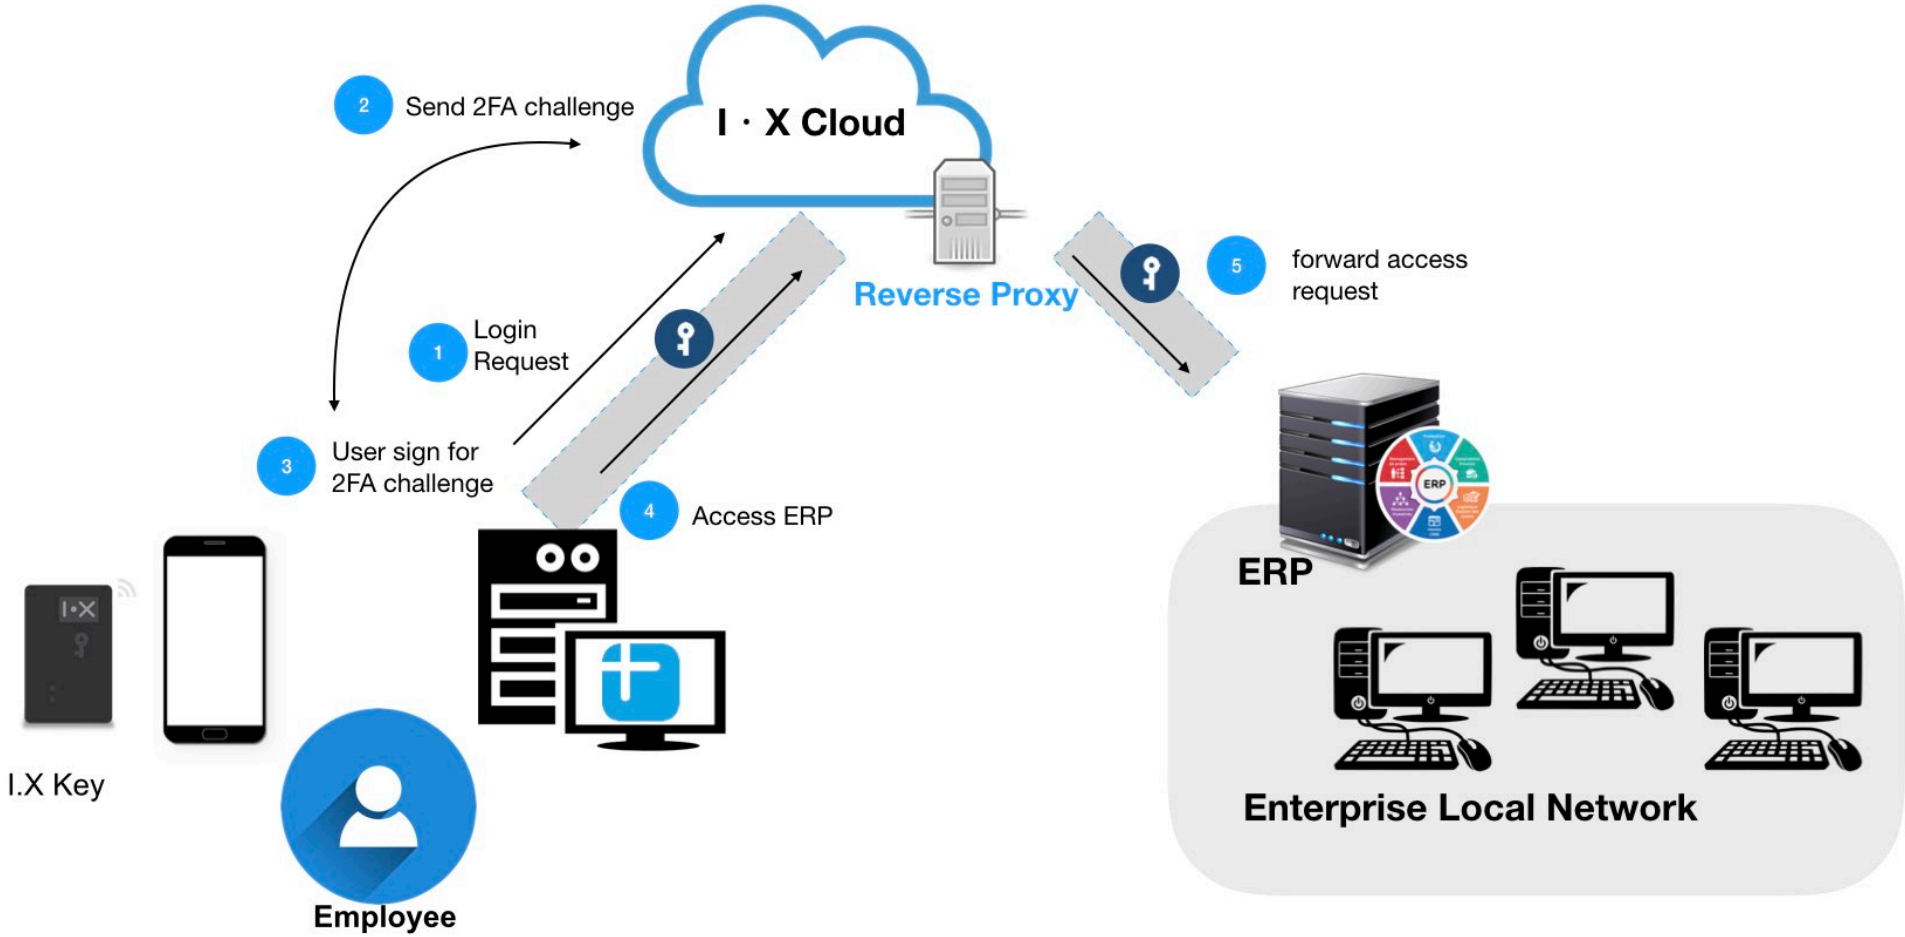
Scenario

- Prohibit data and service access outside company intranet or use VPN remotely
- Mobile worker need come back office to use email, ERP service and document editing

Problem

- For mobile worker who just need to use certain services or email, company provide VPN access with low security token, results in more potential leakage concerns
- Employee has need to edit document outside company

I.X Trio is an Secure and No data leakage solution
Reduce needs of VPN



Semiconductor
(Authentication & Auditing)

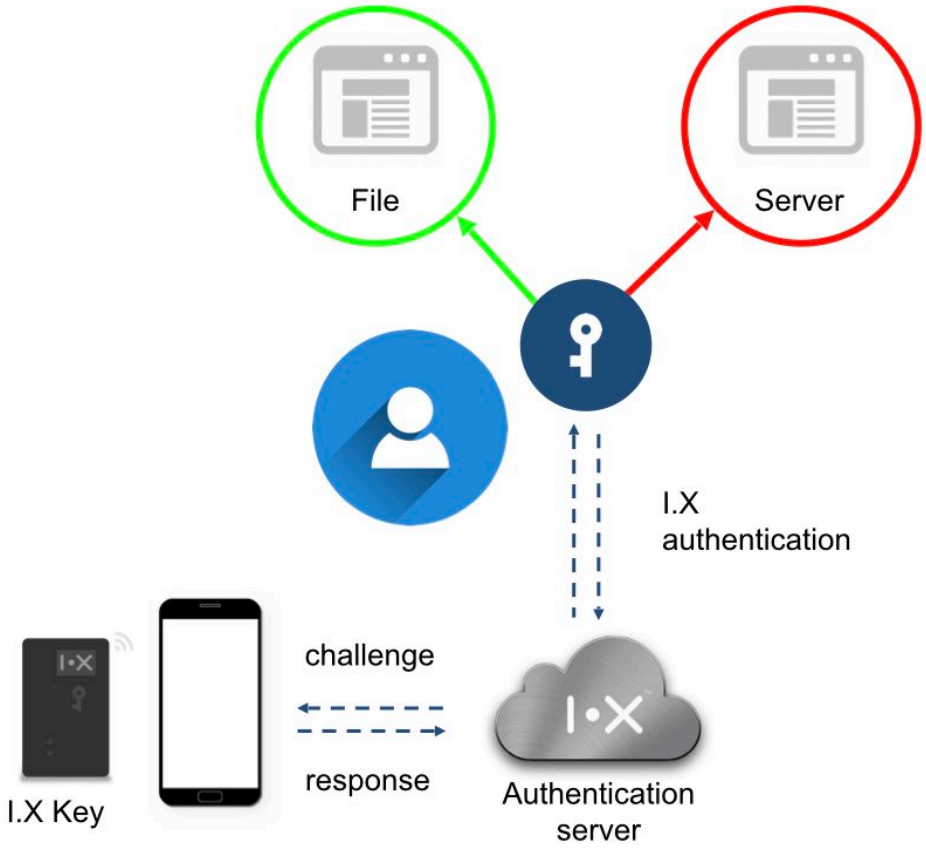
Scenario

- Semiconductor production line is OT environment and with legacy system
- Operator sharing same login and password never change

Problem

- Legacy system difficult to upgrade for security
- Login info usually hard-coded inside execution program, so not able to change and become security hole
- Operator share same login (no digital signature), cannot differentiate real user and not possible for log and audit purpose

I.X Trio Provide 2FA sign-in & Audit



- Operator needs 2FA confirm identity before access workstation, important file or program execution to prevent data leakage
- For high sensitive file access or program execution will require IT manager or upper level supervisor's approval. I.X 2FA mechanism can support multilayer approval mechanism
- User logs and audit reports are automatically generated and managed by I.X Trio Console for immediately access and review
