

Hiratsuka District Organization

Environmental Policy

1. Basic Philosophy

Komatsu Hiratsuka District Organization (Shinomiya, Manda) respects the philosophy of Komatsu Earth Environment Charter and engages in environmental preservation with cutting edge technology. We provide goods and services to society that are in harmony with nature by developing and manufacturing electronic devices/semiconductor manufacturing related equipment, and by reducing CO₂ through the hybridization of products. At the same time, we take into consideration the environment of our business site, and with the basic philosophy of contributing to the local area and the global environment, we think about resource protection and environmental conservation when conducting business activities.

2. Environmental Policy

1. We will comply with laws, regulations and related agreements regarding environmental aspects, and work to prevent pollution and decrease the amount of energy used as well as the emission of greenhouse effect gases.
2. We will work to provide products take into consideration LCA (Life Cycle Assessment) and are easy on the environment, while also continually pursuing technological innovation.
3. We will promote resource (such as materials, water) saving activities while working to reduce the production of industrial waste and increase recycling, and continue to work towards zero emissions.
4. We will establish and review the goals and purposes for improving the environment and engage in continual improvement activities.
5. While promoting the beautification of the organization, we will work to conduct business activities that are harmonious and cooperative with the local citizens.
6. We will engage in environmental activities that contribute to biodiversity.

This Environmental Policy will be made known to all employees who work within the organization as well as our distributors.
